PORTFOLIO

Software developer passionate about building applications and AI-powered solutions that solve real-world problems and create meaningful user experiences. Currently seeking opportunities to contribute to impactful projects and grow within a collaborative, innovative team.

EDUCATION

Abderrahmane Ben Ghazala High School (BTS)

Higher Diploma in Application Development

Coursework: programming, software engineering, and application development.

Casablanca, Morocco

Oct. 2024 – Jul. 2026

Ibno Chouhaid High School

Baccalaureate in Physical Sciences

Casablanca, Morocco

Sep. 2023 – Jun. 2024

EXPERIENCE

North&West

Software Developer

- Delivered multiple software projects for client companies entering the Moroccan market.
- Designed and built internal prospecting tools that locate and qualify potential clients for North&West.

Casablanca, Morocco

Feb. 2026 – Jun. 2026

Indusfer

Web Development Intern

- Developed ResumeIQ, an AI-powered CV analysis and optimization platform.

Casablanca, Morocco

May 2026 – Jun. 2026

PERSONAL PROJECTS

Nexus AI — RAG Platform for Codebases & Documents

Jun. 2026

Built a production Retrieval-Augmented Generation platform that turns GitHub repositories and documents into a searchable knowledge base you can chat with, answering with citations to the exact file, line, or page. Built with FastAPI, Next.js, and Supabase Postgres (pgvector), using hybrid retrieval, reranking, and a multi-provider LLM fallback chain.

PromptCheck — LLM Prompt Testing & Drift-Detection CLI

Jul. 2026

Published an open-source Python CLI (on PyPI) that treats LLM prompts as testable, versioned code and catches prompt drift by diffing each run against a pinned baseline, wired into GitHub Actions to gate CI. Built with Python, Typer, and asyncio, plus a FastAPI + React dashboard for tracking pass-rate over time.

Noesis — Explain-to-Learn Voice & Chat App

Jul. 2026

Built a learning app where each concept blooms in an interactive garden only once you can explain it back, powered by an AI planner, tutor, and examiner with voice input and output. Built with Next.js and React, using Gemini (with automatic fallback), ElevenLabs voice, and a Turso/SQLite database.

Cupid — Bookshop E-Commerce Website

May 2026

Launched an e-commerce site for a coffee house and bookshop: book catalog, cart and Stripe checkout, customer accounts, and an admin dashboard. Built with React, Node.js/Express, and PostgreSQL.

HR-Genius — Conversational Automation for HR Processes

Nov. 2025 – Jan. 2026

Built a web platform combining AI and workflow automation to modernize HR management: generates administrative documents and handles HR requests through a chat and voice interface.

Ghazala AI — Custom Exam Generator Using LLMs

Jul. 2025 – Aug. 2025

Fine-tuned a custom language model that generates exam topics from academic archives and teaching materials, integrated into a dedicated interface for educators.

MultiMind AI — Intelligent Multi-Chatbot Platform

Feb. 2025

Designed a multi-topic chatbot system supporting general conversation and personalized services, built with Node.js, JavaScript, and API integrations.

SKILLS & CERTIFICATIONS

Programming: Python, JavaScript, TypeScript, Java, C#, C, HTML, CSS

Frameworks & Libraries: Next.js, React.js, Node.js/Express, FastAPI, LangChain, Tailwind CSS, Prisma, Vite

Databases: PostgreSQL, MySQL, SQLite, Supabase (pgvector), Turso

AI & Development: Retrieval-Augmented Generation (RAG), LLM fine-tuning (LoRA), NLP, vector search & embeddings (pgvector, FAISS), prompt engineering, automation

Tools & DevOps: Git & GitHub, GitHub Actions (CI/CD), Docker, Vercel, REST APIs, Stripe, pytest

Professional: IT project management, teamwork, leadership, initiative, self-learning

Certifications: Foundations of Prompt Engineering, AWS (Dec. 2025); Generative AI, IBM badge (Mar.–Apr. 2025); AI for Beginners, HP LIFE (Feb. 2025)

Languages: Arabic (native), English (full professional proficiency), French (professional working proficiency)

Interests: emerging technology trends, digital game development, creative writing (poetry), AI, machine learning, and robotics
